 [Elasticsearch](#)

 [TimescaleDB](#)

 [ClickHouse](#)

 [Algolia](#)

 [Celery](#)

 [Redis](#)

 [RabbitMQ](#)

Web & API

 [REST](#)

 [GraphQL](#)

 [HTMX](#)

Previous experience

 [Wagtail](#)

 [Node.js](#)

 [Next.js](#)

 [Vue.js](#)

 [Go](#)

 [PHP](#)

 [Symfony](#)

 [Ruby on Rails](#)

Experience

- **Since 2024: Senior fullstack developer** at [Activity Stream](#).

📍 Scotland

- Greenfield: With the rest of the team, built and scaled the new Django and React based multitenant platform - where each client has their own high-volume Postgres and ClickHouse databases.
- Brownfield: New features and bugfixes on the business' legacy systems, based on Django and Vue.js. Added integrations to new 3rd-party platforms.
- Established type safety by introducing type hinting across the Python codebases, and mentoring the team on related best practices.

Python Django Django REST Framework Celery Postgres ClickHouse TypeScript
React Vue.js

- **2023 - 2024: Senior developer** for the Web agency [Torchbox](#).

📍 Remote

- Greenfield: Led fullstack architecture for a Wagtail/Django platform under tight deadlines. Also managed the migration from the previous CMS and bespoke search logic.
- Brownfield: Took ownership of a large legacy Node.js + Elasticsearch system and led its progressive migration to TypeScript to make bugfixing and addition of new features easier.

Python Django Wagtail HTMX Postgres Node.js Elasticsearch TypeScript React

- **2022: Senior developer** for [SportEasy](#) (as a contractor).

📍 Remote

- Brownfield: Built fullstack features for this Django and React platform serving 3 million users and handling up to 600 requests/second at peak time.
- Championed type safety by introducing type hints to a 10 years old Python codebase, and sharing associated best practices with the team.

Side projects

[ZakuChess](#), my open
source chess Web game

Teaching

HTML/CSS, JavaScript
and Flash teacher for
[Digital Campus](#)

Hobbies

Running, bouldering

Languages

English (fluent)
French (native speaker)

- **2018 - 2021: Lead developer** for Inclusive Energy.

- 📍 Scotland

- Greenfield: Led a 4 engineers team to deliver a IoT solar fleet management system, scaling from pilot to production. I led both the Django and React sides of the development.
 - Greenfield: Designed API structure and data models to support real-time ingestion via MQTT and historical analytics workloads.
 - Greenfield: Proactively migrated historical data storage from Postgres to TimescaleDB to support growing real-time analytical workloads as the platform scaled.

Python Django Celery Postgres TimescaleDB MQTT TypeScript React GraphQL

- **2017: Lead PHP APIs developer** for People's Postcode Lottery.

- 📍 Scotland

- Brownfield: Led a team of 4 PHP developers to maintain the existing user-facing APIs and website.
 - Greenfield: Led the development of a new website based on a modernized data layer architecture.

PHP Symfony RabbitMQ Postgres SOAP

- **2014 - 2016: Forward deployed engineer** at KNP Labs.

- 📍 France

- Greenfield: Led a team of 5 developers to refactor the Balinea platform's backend services.
 - Greenfield: Led a team of 3 developers to rebuild the Collector Square website and CMS, relying on Elasticsearch and Redis as data projection layers.

PHP Symfony JavaScript Elasticsearch Redis

- **2008 - 2014: PHP / JavaScript / Ruby / Flash freelance developer**, working with companies such as Le Monde, Mappy, Uzik...

- 📍 France

- Brownfield: Worked on LeMonde.fr, one of France's main news websites
 - Greenfield: Built a mass mailing Ruby on Rails web application for TV France International
 - Greenfield: Led JavaScript development for the Mappy mobile site

PHP Symfony JavaScript Node.js Backbone.js Ruby Ruby on Rails

Early career: 2000-2009

- **2009: Flash Lead Developer** at Tribal Nova, in Montréal.

- 📍 Quebec

- **2006 - 2007: Flash / PHP Developer** for the Web agency "Les Chinois".

- 📍 France

- **2005: Flash / PHP Developer** for the Web agency "WCube".

- 📍 France

- **2000 - 2004: Web Developer** for the Web agency "Lp Digital".

- 📍 France
